The Fund aims to achieve a return based on a combination of income and capital over the long term.

The Fund will invest primarily in:

- shares

The Fund may also invest in:

- other transferable securities (which may include but are not limited to bonds issued by governments and other organisations, warrants)
- cash, deposits and money market instruments

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

For full investment objectives and policy details please refer to the Prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

- The Fund is in a higher category because the price of its investments have risen or fallen frequently and more dramatically than some other types of investment. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- The Fund may hold a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.
- For full details on risk factors for this Fund, please refer to the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	0.90%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is estimated because the share class has insufficient track record for us to calculate it exactly. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The ongoing charges figure is capped at 1%.
- A dilution adjustment may be applied to adjust the price of units, as it may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market unit price.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- For further information about charges, please refer to relevant sections in the Fund's Prospectus.
